

Instrument Instructor (CFII)

Teaching some of the most safety-critical skills there are.

First: Brush up those **Basic Instrument** skills from a whole new angle - right seat.

If you don't have much glass-panel time, now's your chance!

Next: "**Be the CFI**" practice-teaching IFR ground is one thing. Teaching while under the hood helps you build workload-management skills, the way the pro's do it.

<p>Your training includes customized training:</p> <ul style="list-style-type: none"> *One-on-one instruction to ensure quality *All FAA-required flight and ground training * Incorporating "best practices" makes teaching these skills go smoothly. 	<p>Being a CFII makes you a better CFI, and your customers appreciate it!</p> <p>We can add specialized avionics courses to really increase your expertise!</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------

No FAA-minimum times, averages to be ready range from **\$4,500 to \$7,000.**

One of the easier add-on ratings, the CFII opens all kinds of doors to have fun teaching, and build some Instrument time for later!

Actual training times and costs are dependent on the individual and the training schedule. We'll keep you informed and answer any questions you may have throughout your training.
