

Garmin G1000

Make your transition to "glass-panel" easy!

First: Multi-media ground training to familiarize you on the basics, plus VFR & IFR uses.

Our G1000 simulator can be used along the way to get hands-on time before flying.

Time to Fly: We pattern your flight training on Cessna's factory training for the G1000.

Everything from basic flight tasks to in-depth system use will be fully integrated.

Your training includes customized training:

- * Can be completed in 1-2 days!
- * One-on-one instruction to ensure quality

***FAA-Approved under Part 141!**

Need a BFR or to expand your spectrum of rental abilities?
This is a great way!

Base course can be expanded for Instrument pilots & IPC's.

No FAA-minimum times, averages to finish range from **\$450 to \$650**.
Optional modules for IFR and in-depth abnormal procedures add about \$300 each.

**Go ahead, spoil yourself just a little!
It really will be "smooth as glass!"**

Congratulations!

*Actual training times and costs are dependent on the individual and the training schedule.
We'll keep you informed and answer any questions you may have throughout your training.*
